# ICONS

## COLOUR VARIATIONS

V1 EVEN

The least amount of shade variation attainable.

V2 LIGHT

Light to moderate shade variation within each carton.

## INDICATIONS FOR USE

WALL TILES

FLOOR TILES

COUNTERTOP SURFACE

## SUGGESTED APPLICATIONS

DOMESTIC PURPOSE

Residential areas, hotel rooms, bathrooms

LIGHT COMMERCIAL TRAFFIC AREA

Indoor public areas subject to medium pedestrian traffic such as restaurants, bars, offices, shops, hotel public areas, convention rooms.

OUTDOOR

Outdoor public environments subject to medium pedestrian traffic such as outdoor terraces, stairs, corridors, raised paving, private garden, swimming pool and wellness areas.

Always check the slipperiness characteristics according to the intended environment, in conformity with applicable regulations or laws.

SOFTECH

**The soft transition**

Softech is the next-generation surface, designed as a single surface for both indoor and outdoor spaces. This innovative surface combines high slip resistance with a soft, tactile feel, making it a game-changer in tile technology by applying micro particles to the tile surface, filling in the surface's microscopic cavities to create a smoother, softer, more uniform surface that is easy to clean. This innovative approach provides both safety and comfort. Softech redefines surface technology, providing a pleasant touch, safety, style and a refined matt, non-reflective elegance.

SYNC EFFECT

**High definition structures using digital technology**

Sync effect is a high definition digital structure technology. Digital Structure is a relief effect created using ink on the surface glaze or on the tile body surface. It involves a hydro-repellent activity developed with inks that can be synchronized with the design or can be done random, it always results in a textured depth on the surface.

In printing, colour of the products may differ slightly from actual, pictures are only for reference.

Due to the nature of the ceramic manufacturing process, minor variations in dimensions, the positioning of decorative elements and geometric alignment may occur. As a result, the alignment of decorative designs with the tile background may vary from tile to tile. These variations are an inherent characteristics of ceramic products and are within accepted manufacturing tolerances and applicable industry standards.
