

TERRA

The Terra Bricks collection reinterprets the familiar charm of brickwork through a contemporary, design-led lens. Defined by its compact 6.5×26 cm format and refined matt finish, it brings structure, rhythm, and texture to interior surfaces. Available in a palette of 9 carefully balanced colours, the range is designed to offer flexibility, allowing designers to create everything from subtle tonal compositions to more expressive, colour-driven statements. At the heart of Terra Bricks is a thoughtful balance between material authenticity and modern surface treatment. The textured effect and soft matt finish enhance the natural depth of each shade, while the brick format introduces a sense of order and architectural clarity. Inspired by earthy cement tones and tactile surfaces, the collection incorporates a nuanced fabric-like detail that elevates its visual appeal, lending a quiet sophistication to the overall design.
